

Film Packaging Perforation Cutter for Paste Products

OVERVIEW : This device is utilized in food factories and similar settings to swiftly and effectively create perforations in packaging film for paste products, facilitating easy removal of the film.

- The device's cutter safety cover and blade are simple to dismantle and clean, ensuring hygiene standards.
- An interlock mechanism ensures the motor operates solely when the cutter safety cover is in place.
- Featuring a labyrinth structure, the cutter drive shaft effectively blocks water infiltration.
- Adjusting cutter spacing is straightforward with the provided adjustment dial.

SPECIFICATIONS:
