MUC-8 Model

【Overview】

For biscuit types (soft biscuits, hard biscuits, crackers) and a mixer for the cream.

【Features】

- Since there is a jacket on the outside of the tub, the dough can be mixed with cold or hot water and the temperature can be stabilized.
- Three-speed variable speed impeller rotation allows to select mixing conditions that suit the dough.
- The tilting mixing tub is equipped with a safety mechanism that takes various safety into consideration.
- The top plate opens and closes automatically in conjunction with the tilt of the mixing bucket.
- Can be mixed by switching between three types: hard, soft, and cream (MUC-8 only).
- Mixing rotation speed can be adjusted arbitrarily by lever operation (MUC-8 only).

【Models】

MUC-8	named 8 bag mixture
MUC-14	named 14 bag mixture
