

Wrap Around Caesar

Until now, goods which have been packed by carton box sometimes have cracks and thus incurred loss in the manufacturing chain. This machine has been used to pack products by cardboard without making damage. It has led to reduce the box material cost. Moreover, the shock has been optimized to protect the damage of the products during transportation.

- Outline:**
1. It is a type where the cardboards are rolled around the products and tucked in without damaging the products and the case. Conventionally, the products are put inside the carton box. Thus it creates the risk of damaging the casing materials and eventually induces loss.
 2. 15 cases can be packed in 1 minute.

Specifications:

Name	Wrap Around Caser
Parts and Machineries	Single axis Robot Insertion Conveyor Servo Motor Hot melt equipment Insertion equipment Loading Conveyor
Capacity	15 cases / min
