

Jerky Alignment Equipment

The jerky (dog food) in fixed amount is measured in computer scale, and a fixed quantity comes out, but is in condition not to be able to completely stand in line because a shape is slim. Therefore it arranges standing in line by vibration through this device and cast it into a forwarding bag filling device to a bucket conveyor. it saved labor and cost as well.

Outline:

1. It measures the fixed quantity of dog food in automatic computer scale. It processes 20-30 pack / min.
2. Saving manpower
3. Automatic computer Scaling

Specification:

Name	Jerky Alignment Equipment
Capacity	Max 20-30 pack / min
Material	SUS304

Manufacturer

DAISHIN Co., Ltd.
