

Ultrasonic Cutting Machine

Outline:

In order to improve efficiency and cost reduction, commodity has cut in 10 mm length during backing in oven, where it was cut in 300 mm by saw blade. It cut during backing. The frequency of 20,000 Hz is applied to a phon (cutting edge), by making a phon generate vibration and cutting into it, soft material does not scratch on surface, even if soft dough can be cut.

Specification:

Name	Box Packaging equipment
Parts and Machineries	Servo Motor Bucket Conveyor Cam Link AC200V
Capacity	Max 25 box / min
Body Dimensions	Height 1400 (mm), Length 2600 (mm), width 700 (mm)

Manufacturer

DAISHIN Co., Ltd.
